

# Offshore Service Technician

- Location: Slidrecht
- Department: Service
- Contract type: Permanent
- Workinhours: Full-Time

Operate and maintain world-class offshore equipment at the forefront of global energy and infrastructure projects.

At IQIP, you'll operate high-performance equipment so that it performs at its best—offshore and onshore. From commissioning to maintenance, you'll deliver real impact with innovations such as the Hydrohammer®, PULSE®, Noise Mitigation System, and EQ-Piling on groundbreaking foundation projects. We offer variety, autonomy, and adventure. Wouldn't you like to work with the world's most powerful hydraulic impact hammer? Combining hands-on skill with cutting-edge tech, you'll work in unique environments, grow your technical expertise, and be part of a team that values safety, precision, and impact.

Let's make an impact—together.

## Your work

As an Offshore Service Technician, you will be deployed worldwide to offshore projects where IQIP's advanced equipment is used for installation and foundation work. You will be responsible for commissioning, operating, and maintaining hydraulic and mechanical systems in harsh marine environments. In this role, you ensure reliable and safe performance of equipment on-site while supporting our clients and project teams during mission-critical operations.

## Your responsibilities

- Operate our equipment on site
- Perform commissioning, service, and maintenance work on offshore equipment
- Operate hydraulic hammers and handling systems during offshore installation projects
- Troubleshoot mechanical, hydraulic, and electrical issues on-site
- Work closely with engineers, project teams, and clients to ensure safe and efficient execution
- Keep detailed records of service work and provide feedback for continuous improvement
- Ensure compliance with safety procedures and quality standards in offshore environments

## Your profile

- Technical education (MBO level 3 or 4) in mechanical engineering, mechatronics, or a related field
- Experience in offshore or field service roles is preferred
- Solid understanding of hydraulic and mechanical systems
- Hands-on, proactive, and able to work under pressure in remote conditions
- Fluent in English; additional languages are a plus
- Willing and able to travel and work offshore for extended periods
- Valid offshore certifications (BOSIET, HUET, medicals) or willingness to obtain them

## What IQIP offers

- An opportunity to drive the energy transition with us
- Push boundaries to shape tomorrow's world
- Outstanding learning opportunities
- Monthly salary depending on your level and expertise
- Annual bonus (profit sharing)
- 8% holiday allowance, paid annually
- 40 paid annual leave days (27 holidays + 13 additional days)
- Benefits such as travel allowance, laptop, and educational opportunities
- PME pension fund (CLA/CAO Metalektro applies to this job)
- Main working location is Slidrecht, with international offshore travel
- Flexible working hours

## Why IQIP?

We design and manufacture high-quality equipment, tackling challenges through shared expertise and commitment to sustainable solutions. Safety, teamwork, and individual talent power our success as we build a better world for future generations.

## Forward Thinking.

Forward Doing. We lead with innovation and integrity. Delivering quality and results.

## Global Impact.

Real Challenge. Our projects are challenging and shape the energy and infrastructure landscape of tomorrow.

## People First.

Always. You get autonomy, support, and room to grow.
