

Work Preparator

- Location: Sliedrecht
- Contract type: Permanent
- Workinhours: Full-Time

Coordinate and optimise the preparation of offshore equipment projects, ensuring a smooth and efficient production process for high-tech foundation and installation solutions.

At IQIP, you'll ensure we're building tomorrow's foundations by assembling, overhauling, and testing advanced equipment used in key infrastructure projects worldwide. For four decades, IQIP has successfully navigated challenges and built up extensive experience in a wide range of markets, including offshore wind, coastal & civil, offshore oil & gas, and decommissioning. Who wouldn't want to take part in building the world's most powerful hydraulic impact hammer? Join a high-tech, hands-on environment where your skills are valued, and growth is part of the journey.

Together, we'll deliver solutions that make a real, lasting impact.

Your work

As Work Preparator at IQIP, you are responsible for preparing the manufacturing and assembly process of high-end offshore equipment. You serve as the key link between engineering, production, and project management. Your work ensures that all necessary materials, documentation, and planning are in place for an efficient and high-quality production process.

Your responsibilities

- Translate technical drawings and engineering input into clear work instructions and production planning
- Ensure timely availability of materials, tools, and documentation
- Collaborate with engineering, procurement, and production to resolve planning and technical challenges
- Support the monitoring of progress, quality, and cost during preparation
- Identify and implement process improvements and standardisation in work preparation
- Maintain accurate documentation in ERP and planning systems
- Act as a sparring partner for production, ensuring alignment with project goals

Your profile

- MBO+/HBO education in a technical or mechanical direction
- Experience in a work preparation or planning role in a technical production environment
- Strong technical insight and the ability to read and interpret technical drawings
- Familiar with ERP systems and production planning tools
- Hands-on, structured, and solution-oriented approach
- Good communication skills in Dutch and English
- Able to perform under pressure and manage changing priorities

What IQIP offers

- An opportunity to drive the energy transition with us
- Push boundaries to shape tomorrow's world
- Outstanding learning opportunities
- Monthly salary depending on your level and expertise
- Annual bonus (profit sharing)
- 8% holiday allowance, paid annually
- 40 paid annual leave days (27 holidays + 13 additional days)
- Benefits such as travel allowance, laptop, and educational opportunities
- PME pension fund (CLA/CAO Metalektro applies to this job)
- Main working location is Sliedrecht
- Flexible working hours

Why IQIP?

We design and manufacture high-quality equipment, tackling challenges through shared expertise and commitment to sustainable solutions. Safety, teamwork, and individual talent power our success as we build a better world for future generations.

Forward Thinking.

Forward Doing. We lead with innovation and integrity. Delivering quality and results.

Global Impact.

Real Challenge. Our projects are challenging and shape the energy and infrastructure landscape of tomorrow.

People First.

Always. You get autonomy, support, and room to grow.
